# SERVICES

We support 3 engagement models that help clients meet their business goals and fit their operational and financial objectives. Each engagement model is cost effective and has a number of benefits.

## Dedicated Offshore Team

- An offshore team of VARTEQ specialists is assigned to work exclusively on a series of client's projects.
- Project management is performed by the client through direct communication with dedicated VARTEQ offshore team lead.
- Offshore team adopts to existing client methodologies and best practices and may offer improvements upon request.
- The model allows for a full scope control by the client.

## Hybrid On-site / Offshore Team

- A dedicated team of offshore VARTEQ specialists is assigned to work exclusively on client's projects and is lead by an on-site VARTEQ leadership.
- On-site professionals help coordinate offshore team efforts and report to client's management.
- Team adopts existing client methodologies and best practices and may offer improvements upon request.
- The model allows for great communication between client and the team allowing for additional business expertise and knowledge transfer capabilities.
- The client retains full control over the team's activities with an option to delegate some of the daily coordination tasks to the on-site VARTEQ team leadership.

## Staff Augmentation

- Select VARTEQ specialists are assigned to work exclusively on client's projects together with client's staff and lead by client's management.
- Highly skilled VARTEQ professionals offer valuable expertise to the combined team.
- VARTEQ specialists adopt to existing client's methodologies and best practices.
- The client has full control over the project.
- The model allows clients to temporarily expand their staff to achieve their business goals.

# PROCESS

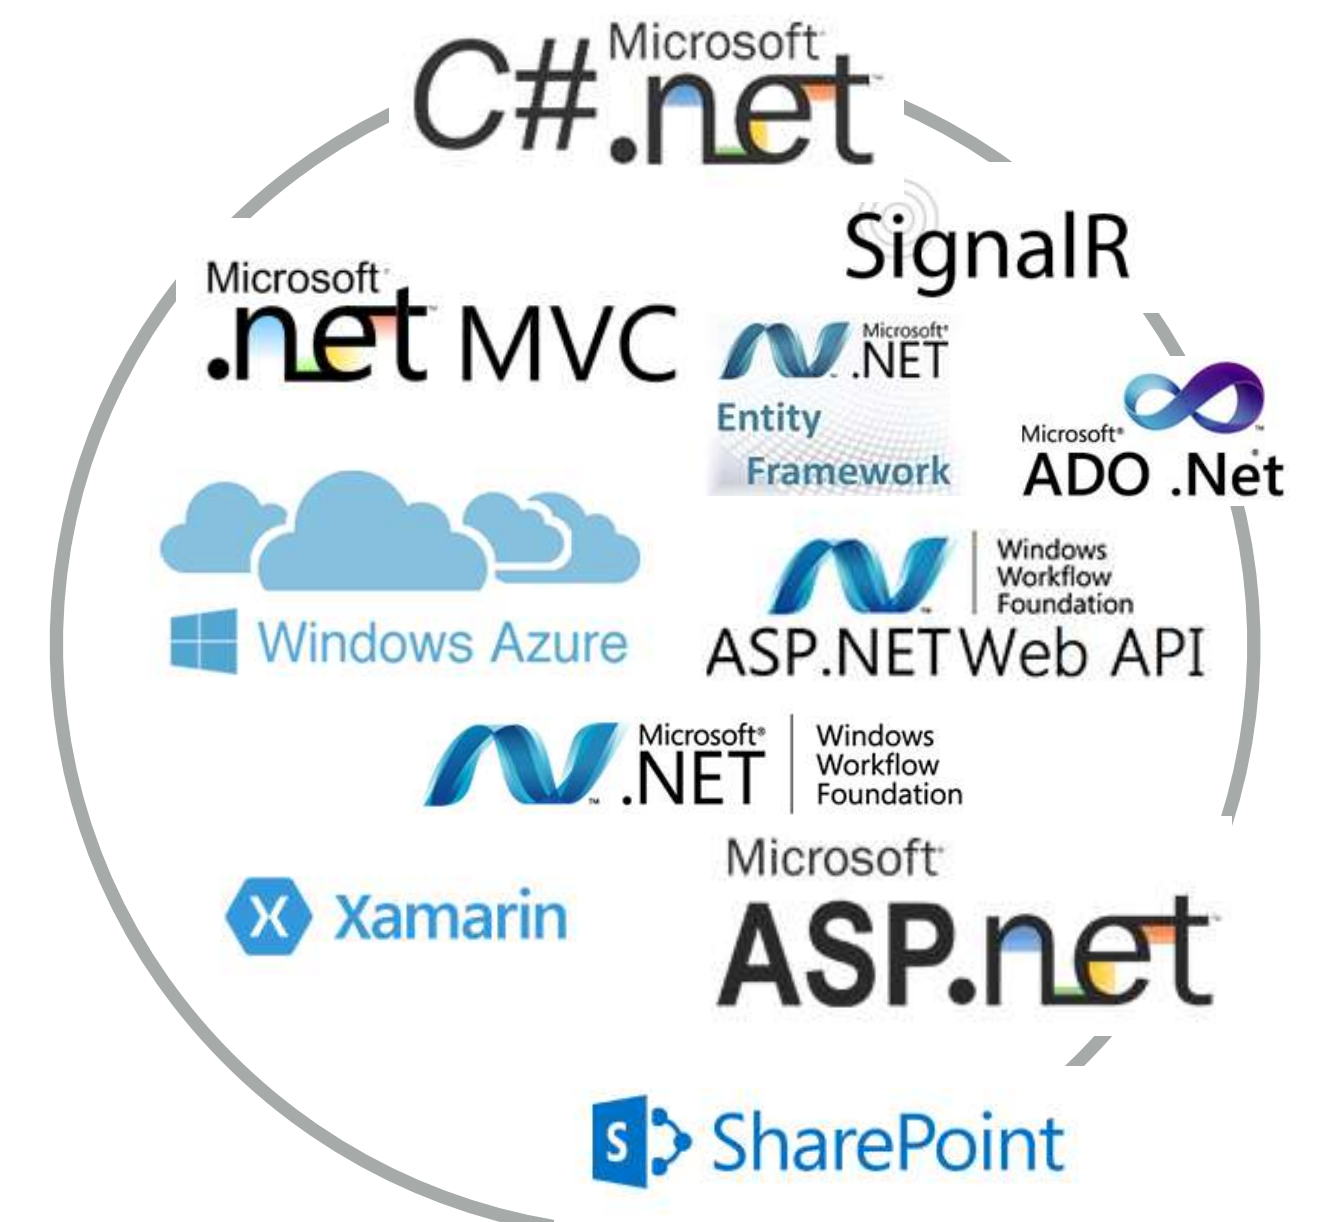

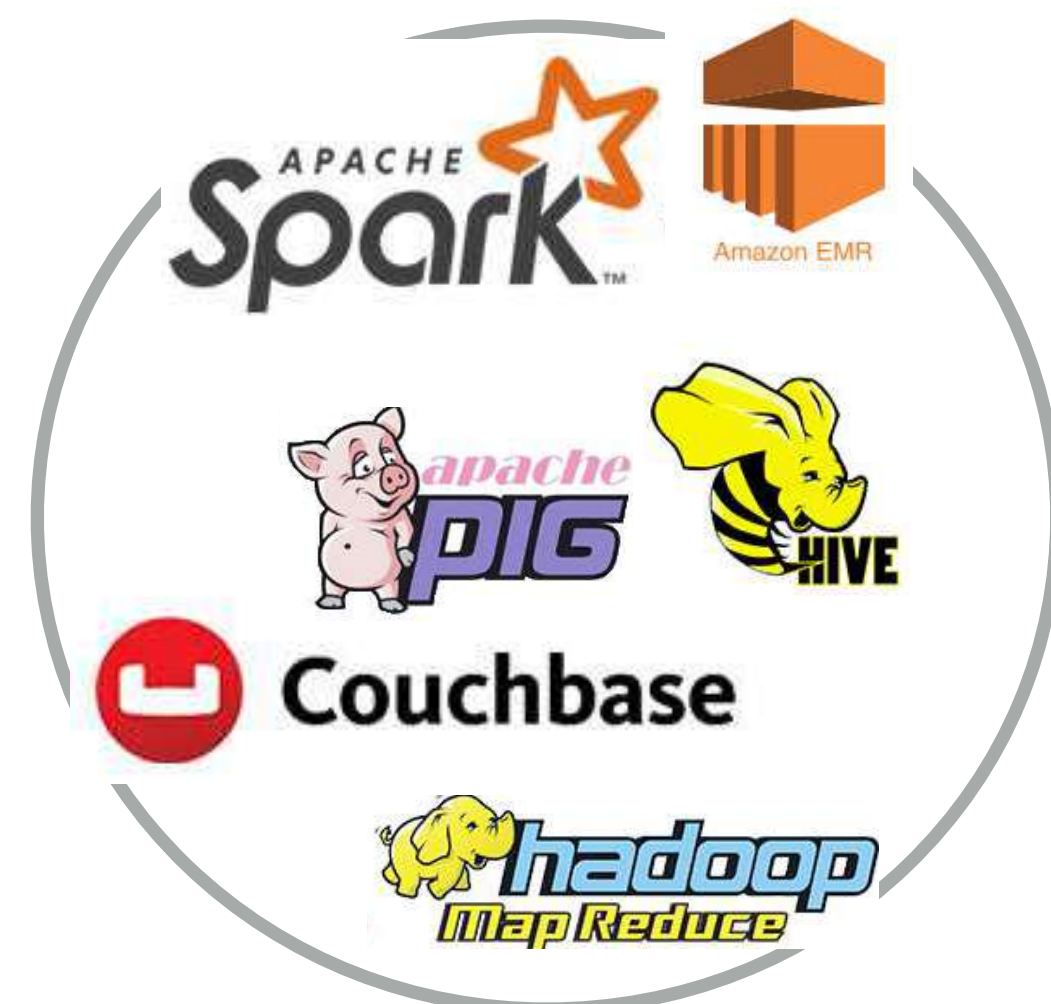

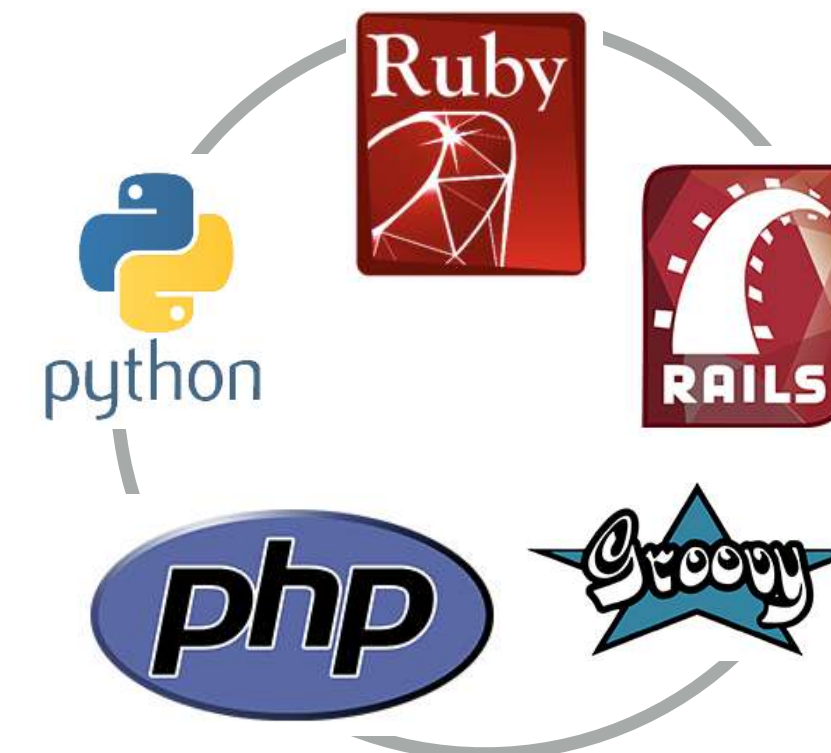

---

- Agile development process.
- Daily SCRUM meetings.
- Weekly demos.
- 2 week sprints.
- Test-driven development.
- Continuous integration.
- Adherence to coding standards.
- Knowledge transfer.
- Constant communication over Skype and email.

# TECHNOLOGIES

# INDUSTRIES

# GAME DEVELOPMENT

- We can take your idea of a game or an application and grow it to a production quality product.
- We can help you shape the idea to a profitable application by contributing with our knowledge of viral features and monetization concepts.
- We deliver software for all major mobile and browser friendly platforms including iOS, Android, Unity3D and more.
- We develop backend side of the overall solution using a technology of your choice including LAMP, Java/JEE, .NET technology stacks.
- Our designers will give your 2D or 3D game an attractive look to stand out from the competition and improve user satisfaction.
- We can save you money by performing most of the work in our Ukrainian offshore development office.
- We can host your game's backend in our FESTi cloud.
